

Name: _____

VOLUME

- Volume is the amount of space inside a 3D shape, measured in **cubic units** (e.g., cm^3 , m^3).
- For a **cuboid**, use the formula: **Volume = Length \times Width \times Height.**

In a cube, all the sides are the same length.

- This means the formula becomes: **Volume = Length \times Length \times Length.**

Calculate the volume of the following (diagrams not to scale):
