

Name: _____

UNDERSTANDING FACTORS:

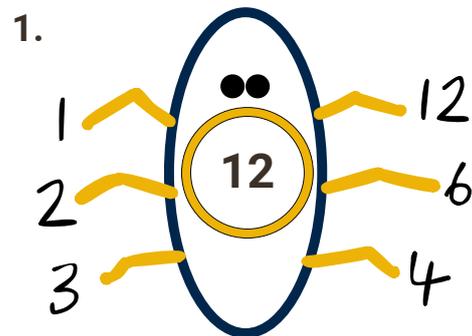

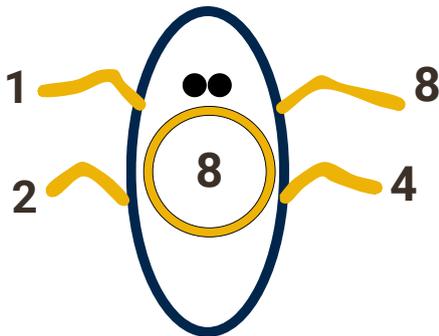

Factors are numbers that divide into another number exactly and without leaving a remainder.

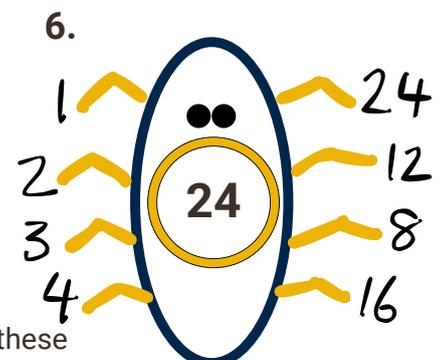

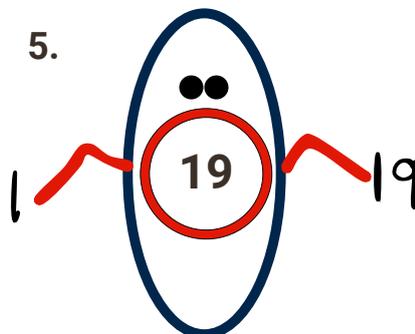

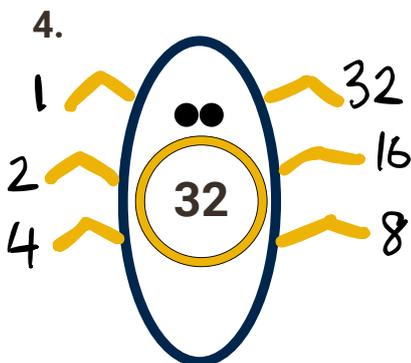

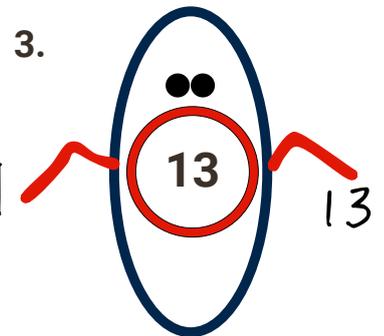

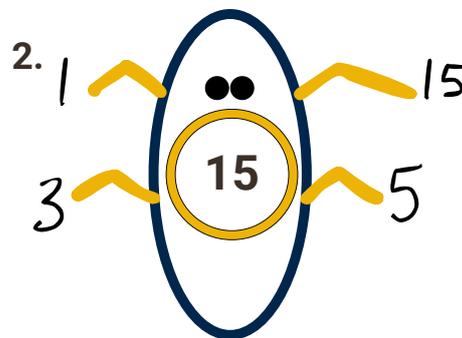

All factors are integers (whole numbers).

Factor Bugs

This is an example of a factor bug.

Each leg (or tail) is a **factor** of the bug's number (8)

7. Look at your answers to questions 3 and 5. What do you notice about these numbers? Can you describe a special property they share?

They only have 2 factors - PRIME NUMBERS

Name: _____

UNDERSTANDING FACTORS:

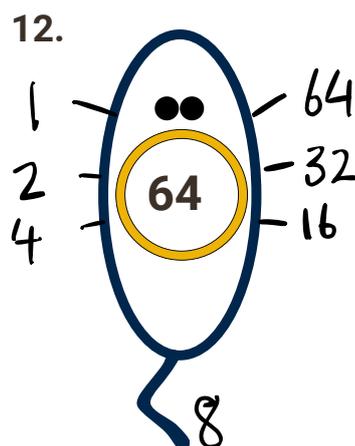

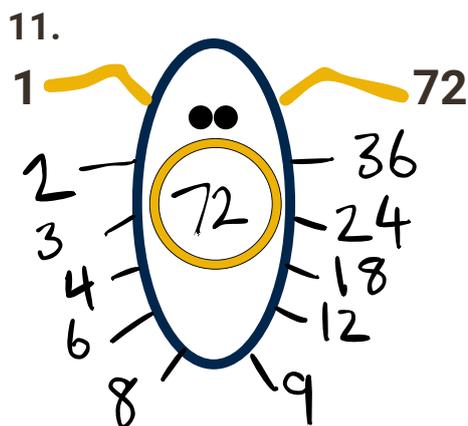

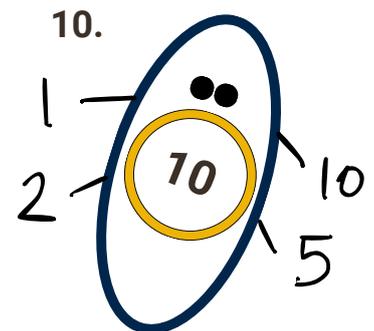

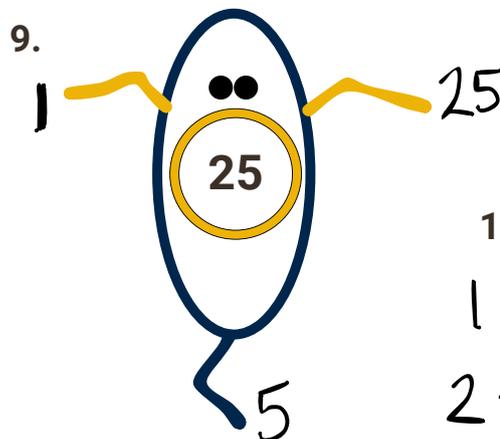

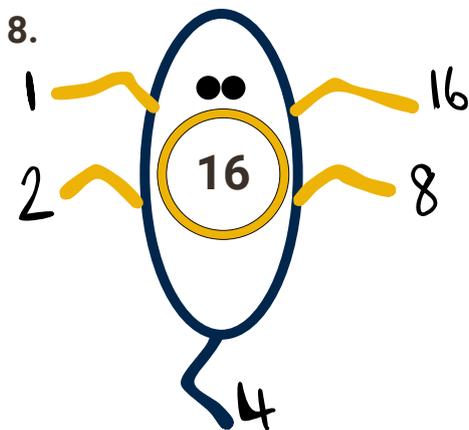

Factors are numbers that divide into another number exactly and without leaving a remainder.

All factors are integers (whole numbers).

Factor Bugs

Section 2: Some of these Factor Bugs have a **special tail**. Can you figure out why? For some of these bugs, you'll also need to draw in their legs yourself.

13 What can you observe about the Factor Bugs with a tail?

They have an odd number of factors - **SQUARE NUMBERS**
